

DSE

CRC/TR 224 & ECONOMETRIC SOCIETY SUMMER SCHOOL
in
DYNAMIC STRUCTURAL ECONOMETRICS (DSE)
Household decision making and human capital in life-cycle models
University of Bonn
August 16, 2021 – August 22, 2021
Application deadline: **March 31, 2021**

We are pleased to announce the next event in the sequence of Econometric Society summer schools in *Dynamic Structural Econometrics*. The primary focus of DSE summer schools is to provide advanced PhD students with tools and “hands on” computational instruction to carry out research in applied structural microeconometrics with a strong emphasis on closely integrating economic and econometric theory in empirical work. The school covers state of the art methods for solving, simulating, and estimating dynamic programming models. We use a variety of empirical applications to illustrate how these tools and methods are combined in a sound computational science workflow. Students will present their research and have ample chance to discuss it with colleagues and lecturers.

The 2021 CRC/TR 224 & Econometric Society DSE summer school consists of 5 days of lectures held in conjunction with the Dynamic Structural Econometrics Conference 2021 (August 19-20, 2021). The local partner is the CRC/TR 224 “Economic Perspectives on Societal Challenges” financed by the German Research Foundation.

The theme of the **Dynamic Structural Econometrics Conference 2021 (August 19-20, 2021)** is **“Household decision making and human capital in life-cycle models”**.

The conference brings together top junior and senior researchers from the field to discuss recent advances in theoretical and applied work.

Submission deadline: March 31, 2021

Lecturers of the summer school and invited conference speakers include:

- Orazio Attanasio (Yale University)
- Richard Blundell (University College London)
- Monica Costa Dias (Institute for Fiscal Studies)
- Mariacristina De Nardi (University of Minnesota)
- Philipp Eisenhauer (University of Bonn)
- Eric French (University of Cambridge)
- Hans-Martin von Gaudecker (University of Bonn)
- Fedor Iskhakov (Australian National University)
- Michael Keane (University of New South Wales)
- Karen Kopecky (Atlanta Fed)
- Hamish Low (University of Oxford)
- Robert A. Miller (Carnegie Mellon University)
- John Rust (Georgetown University)
- Bertel Schjerning (University of Copenhagen)

Interested students and presenters are invited to submit their applications via the website

<http://dseconf.org/>

All applicants must be a member of the Econometric Society at the time of application. To join the Society, visit the Society homepage <http://www.econometricsociety.org>

We hope to see you in Bonn in August 2021! However, due to the current uncertainty of the CoViD-19 situation and potential travel restrictions, we might need to change the setting to a hybrid event or even hold it in an entirely virtual fashion. We make this decision closer to the date of the event.

2021 DSE Organizers: Philipp Eisenhauer, Hans-Martin von Gaudecker, David Koll
DSE Core organizing committee: Fedor Iskhakov, John Rust, Bertel Schjerning
